

Julie Sorenson, M.S., received her master's degree in computer and information science from the University of New Haven. With APTMetrics, Inc. since 1995, Julie has played a key role in the development of APTMetrics' product platform and is a key partner in implementation of solutions for our clients. Her experience covers a range of products, including multi-source feedback, job analysis, and selection testing across a broad range of industries.

As product solutions manager, Julie focuses on providing innovative solutions to customer problems. Leveraging her education and experience in software development, she gathers and documents system requirements and works closely with the technical lead during product development. She is also responsible for developing and maintaining testing procedures and quality standards. Julie partners with the consulting project team to manage the implementation of APTMetrics' product solutions.

Julie's experience with APTMetrics includes working as the manager of the application development department and as lead application developer. As manager of application development, she is responsible for overseeing all aspects of customer solutions, focusing on requirements analysis, design and implementation of software and Web applications.

Prior to her work at APTMetrics, Julie worked in the healthcare and insurance industries.

Julie is a member of the International Institute of Business Analysis.
